

Certification Training in CIITS

August 29 & 30 and September 18 & 19, 2013

Workshop #067-13

The Green River Regional Educational Cooperative will host a four-day training in the Continuous Instructional Improvement Technology System (CIITS). Participants will have the opportunity to deeply experience the CIITS classroom, assessment, and data modules.

CIITS training will begin with an overview of the Assessment Administration tab in which users will learn how to create items and assessments, following up with how to administer assessments to students using online testing and clickers. Assessment information will then be analyzed using the Classrooms tab within CIITS, reviewing the dashboard that will allow a user to analyze student performance from an individual level to the section level, and up to the school and district levels.

Attendees will also be introduced to the Instructional Materials module within CIITS, where they will learn how to create resources, lesson plans, and instructional units, all of which can be placed on the Lesson Planner.

After this training all successful attendees will be certified as CIITS Instructors. Certified instructors will leave with all of the materials they need to return to their districts and successfully train and support CIITS.

"The Continuous Instructional Improvement Technology System(CIITS) will connect standards, electronically stored instructional resources, curriculum, formative assessments, instruction, professional learning and evaluation of teachers and principals in one place, thereby improving instructional outcomes, teacher effectiveness and leadership."-- Terry Holliday, Ph.D. Education Commissioner
